

RW Flow Controls, Inc.

Celebrates 21 Years, 1989-2010

RW Flow Controls Now Offers a Full Line of **WKM Ball Valves**

RW Flow Controls, Inc. is pleased to announce their product line now includes WKM Ball Valves. As of February, 2009, RW Flow Controls, Inc. will stock a complete line 2" through 16" of WKM DynaSeal 370D4 Trunnion Ball Valves. This product expansion will allow RW Flow Controls, Inc. to further serve our customer's valve needs. All WKM Ball Valves are API-6D Monogrammed and Fire tested Per API-6FA.

WKM DynaSeal 370D4 Trunnion Ball Valves

Your Check Valve Specialist

Since 1989, RW Flow Controls has provided customers with check valves for many different applications. We undoubtedly have one of the largest check valve inventories in the nation. We now have acquired the Cameron / WKM line of Trunnion Mounted Ball Valves, as well as Floaters, either full port or regular/reduced port and with valves trimmed as a standard with Nylon Seat Inserts, Viton-A Seals, and Fire-Safe to API6FA/API-607. Valve can be furnished either bare stemmed, wrench head, or worm gear operated. Let us be your full line supplier of standard and specialty ball and check valves. Valves are furnished with a VTR (valve test report), as well as MTR's. All valves are serialized with name plates.

Tom Wheatley Valve Company: A Legacy of Excellence since 1933

Since 1933, the Tom Wheatley Valve has strived to provide the upmost quality in both their products and customer service. With over 70 years of experience, Tom Wheatley Valve is a leader in the business of flow control. This legacy of customer service and know how is continued today with Tom Wheatley III, owner and president of RW Flow Controls.

Your Piston Check Valve Specialist
